

Increased funding for MK schools

More positive news from Government with the announcement that schools in some of the least fairly funded local areas will benefit from a Â£390 million cash boost. Â The biggest step towards fairer schools funding in a decade.

What does this mean for schools in Milton Keynes? The schools budget across MK will rise by Â£0.6m, which is a positive message from this Government to secure a better future for our children.Â

Children in MK deserve the very best from our schools and that is why I welcome this cash boost. It means our schools will get the resources they are entitled to and will help enhance the quality of education they so rightly deserve.
