

Innovation at Bosch

I was delighted to have had the opportunity to visit Europe's largest manufacturer of home appliances which is based in Wolverton.

My visit to BOSCH & BSH Home Appliances gave me an insight into the meticulous attention given when designing their products, from ovens to dishwashers, washers and dryers, from refrigerators to hairdryers, to mention but just a few of their innovatively designed goods!

Providing employment for 280 people, offering work experience opportunities via local secondary schools and MK College, BOSCH & BSH are a thriving international business whose achievements have been duly recognised in winning the Which? Award four years in a row.
